

# SYSMIC SYSMIC

Examples of Sysmic's communication through printed elements

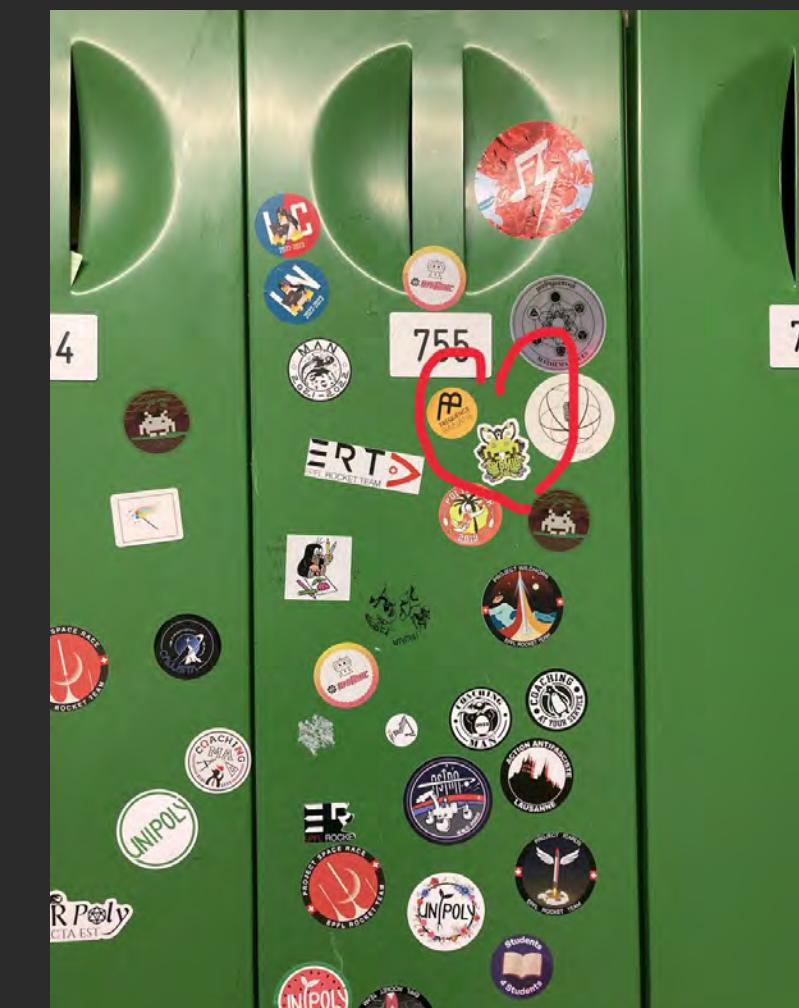

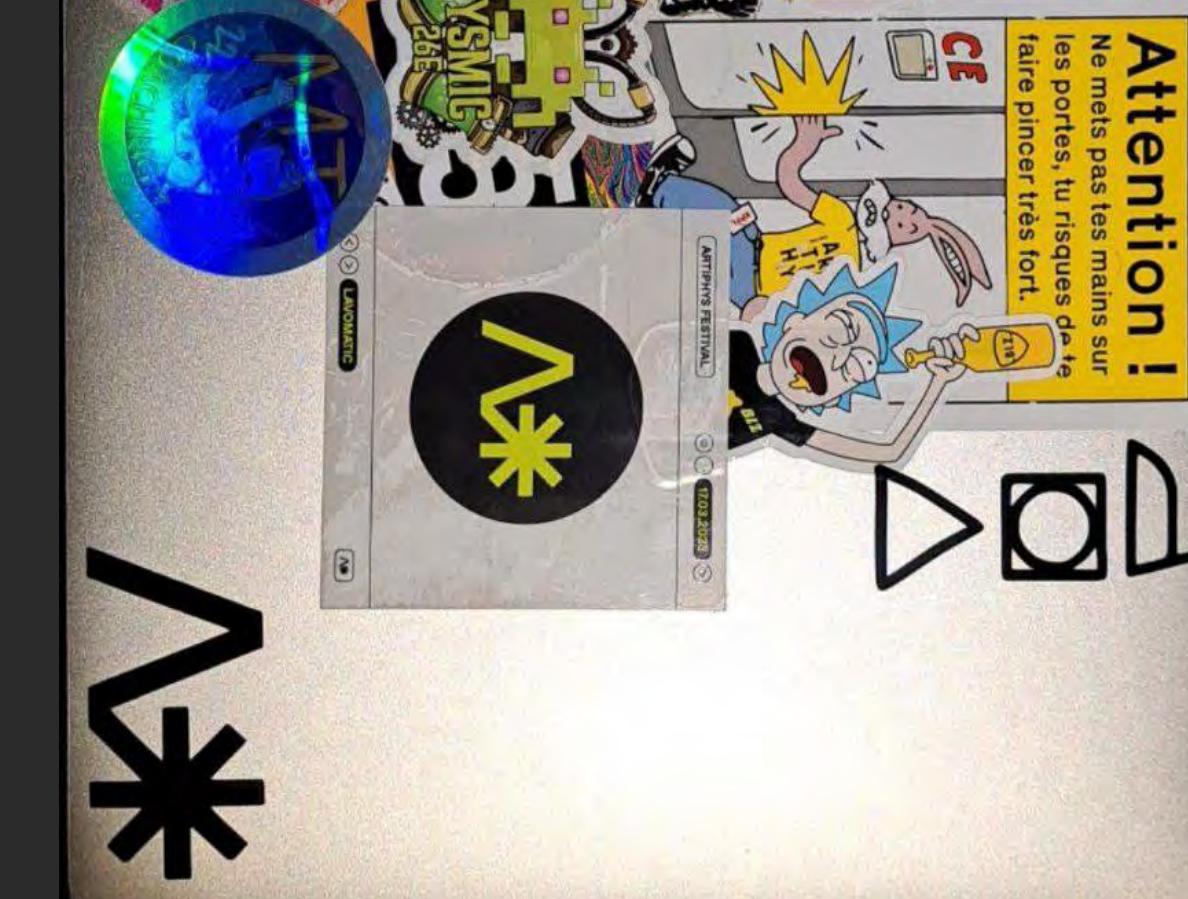

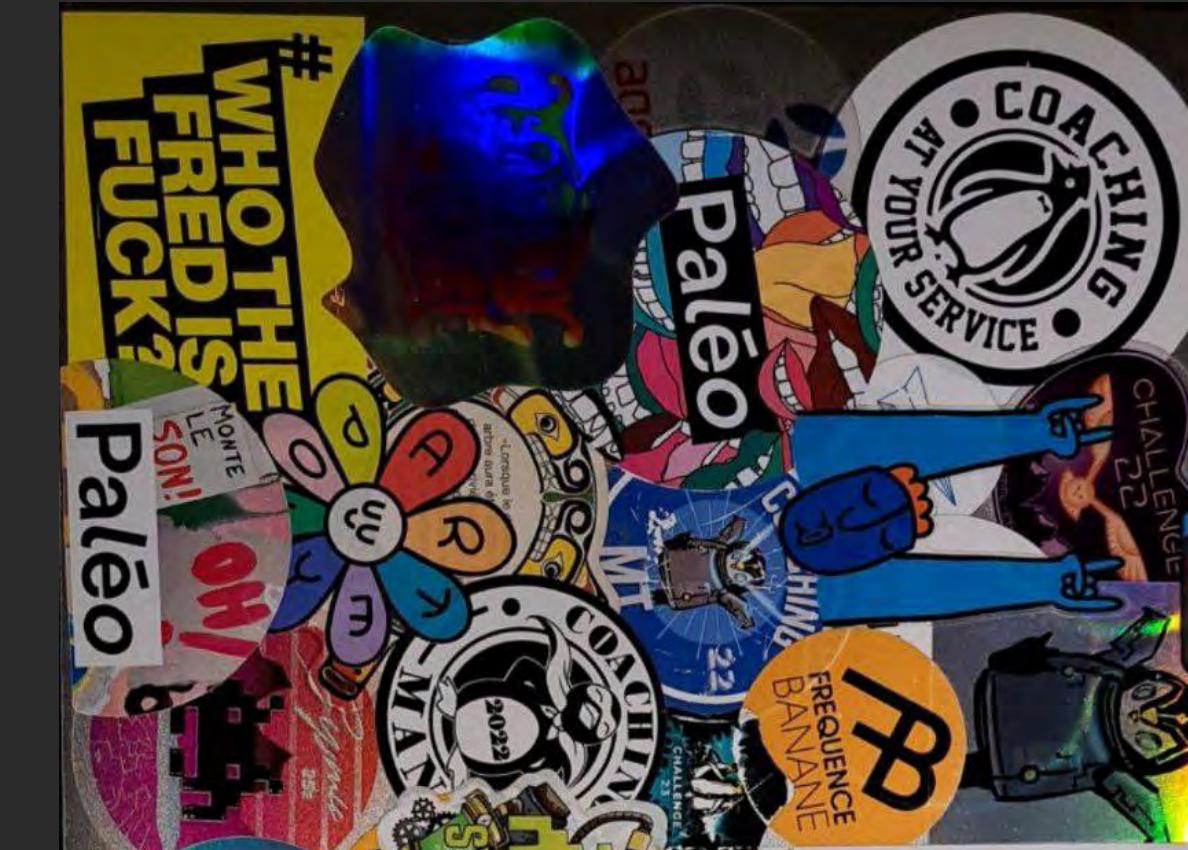

This serves as a graphical complement to our sponsorship proposal to endorse our needs.  
They are better explained in the written demand.

# SYSMIC SYSMIC

# STICKERS

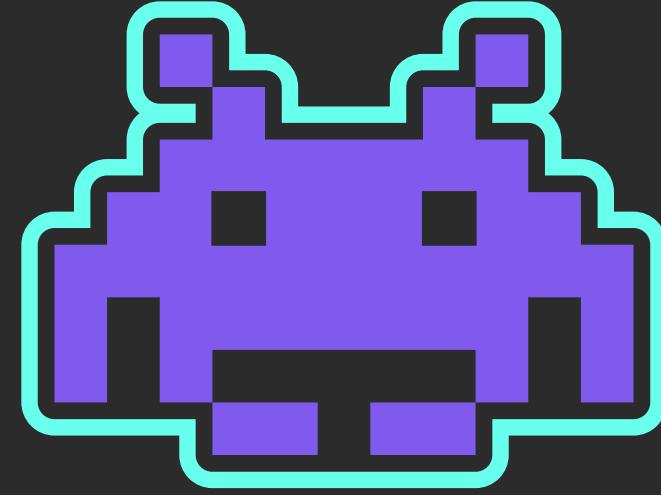

**Stickers are proudly showcased on students' PCs, and any other clever place**

**They are the most iconic communication device for EPFL's associations. Associations are constantly seeking to stand out by their quality and originality.**

**They are usually produced in numerous quantities, between 500 and 3000.**

**\* lockers**

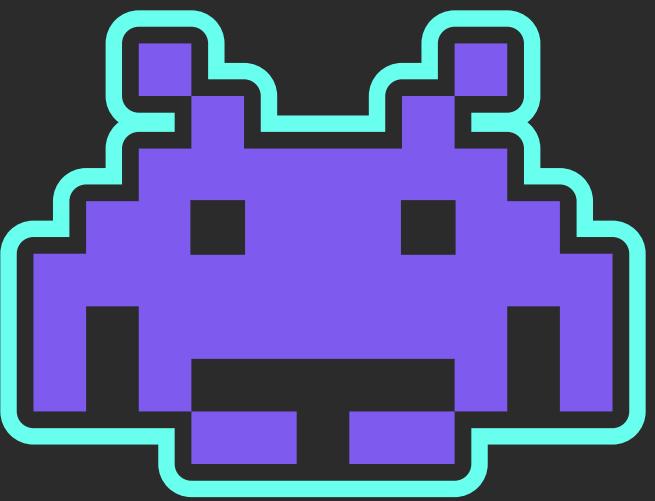

# PROMOTIONAL BANNERS

**Promotional devices such as tarpaulins banners are widely used when we hold stands in other events, such as Vivapoly or Balélec**

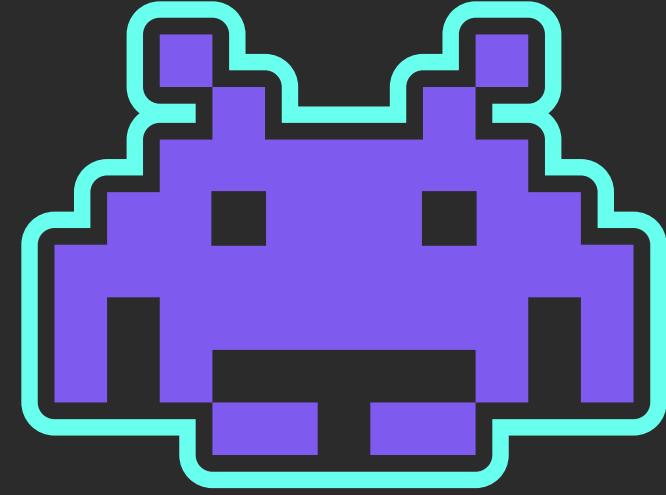

**We are looking to acquire more promotional devices such as brand new tarpaulins (matching our new graphic identity), oriflams and anything else of that category.**

# PRE-RENTALS

Pre-rentals tickets also are an important part of our budget. We produce more or else 1000 of them each year.

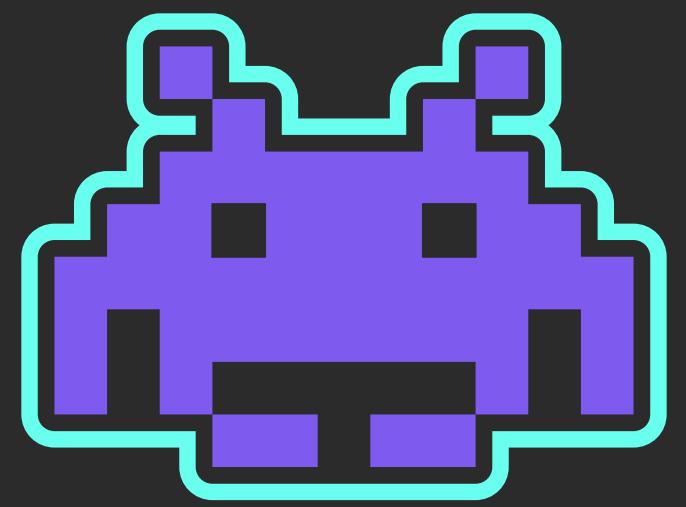

# WRISTBAND

**Custom wristbands are expensive but will stay on many people's wrist for a long time**

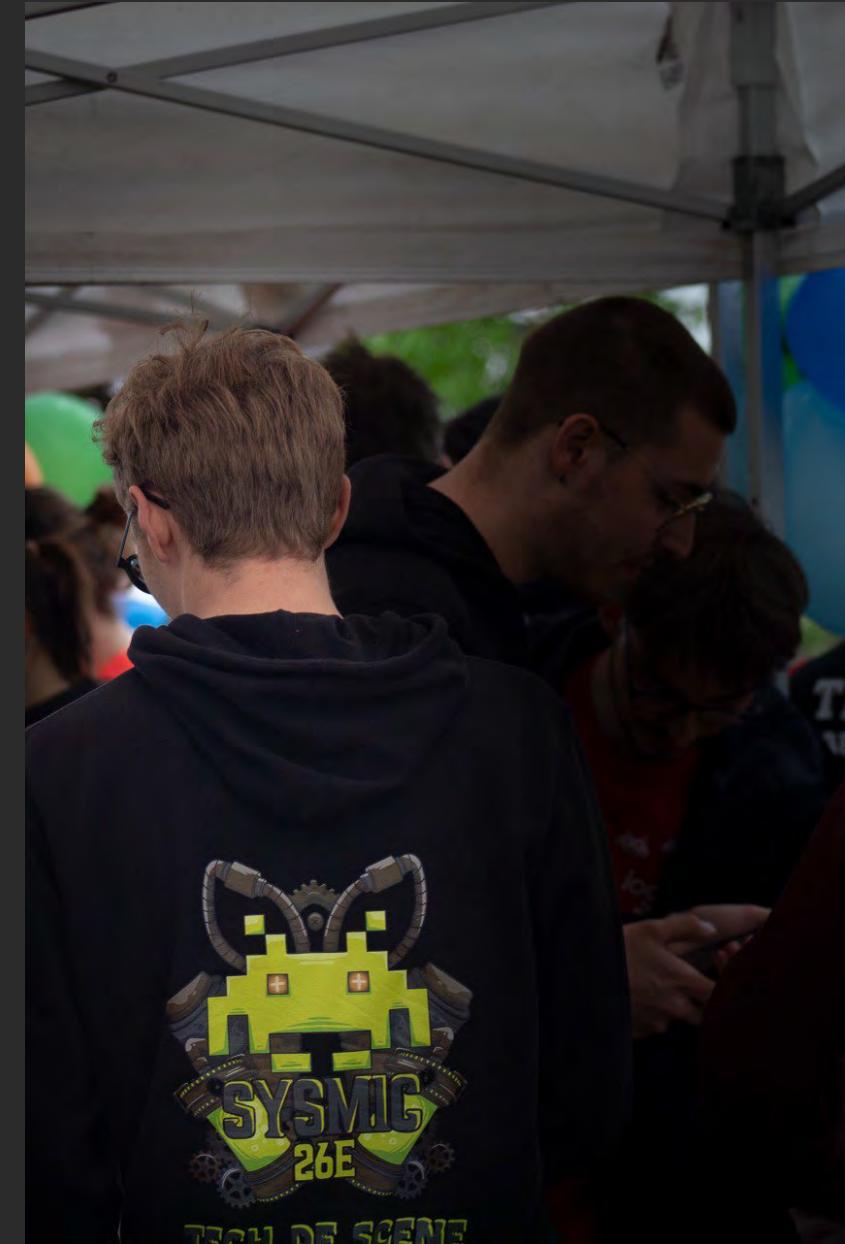

**Custom wristbands were made in 2019, but never after since it is a high cost. This year, we would like to reintroduce them.**

# GOODIES

**Goodies are one of the most appreciated product an association can get their hands on. However, as they can get costly quickly, very few are to be seen. Quality goodies can make our association stand out and tickle others interest about making their own**

Neck straps are useful in a festival. They will be held by staffs, artists and many more. Outside the event, they will be lend and used in different occasions

Even if Pixartprinting is not offering sweats or caps, this is to endorse the fact that associations' communication mainly goes through daily visible products.
